

Subprocessors

Every provider, named and reviewed.

Helmsted, Inc. Version 1.5 · September 19, 2026 helmsted.ai/security/subprocessors

Subprocessors handle information on Helmsted's behalf for the services identified below, under required contractual protections. Retention depends on the service and configuration. Independently engaged professionals are separate recipients when serving their own client engagements. The DPA governs oversight, responsibility, and changes.

SUBPROCESSOR	SERVICE AND INFORMATION	LOCATION	PRIVACY AND TRUST
Vercel Inc.	Application delivery and AI request routing; request/response content and metadata.	United States	vercel.com
Render Services, Inc.	Application and agent hosting; documents, context, outputs, and session information.	United States	render.com
Google LLC (Google Cloud)	Configured compute and infrastructure; information depends on workload.	United States	cloud.google.com
Supabase, Inc.	Database, authentication, and sessions; accounts, records, permissions, and audit information.	United States (US West, Oregon)	supabase.com
Anthropic, PBC ZDR	AI processing of submitted task information under the required no-training and zero-retention arrangement.	United States	trust.anthropic.com
OpenAI, L.L.C. ZDR	AI processing of submitted task information under the required no-training and zero-retention arrangement.	United States	openai.com
xAI Corp. ZDR	AI processing of submitted task information where enabled, under the required no-training and zero-retention arrangement.	United States	x.ai

SUBPROCESSOR	SERVICE AND INFORMATION	LOCATION	PRIVACY AND TRUST
TypeSafe AI, Inc. ZDR	AI processing of submitted task information under the required no-training and zero-retention arrangement.	United States	typesafe.ai
Hyperdoc Inc. (d/b/a Recall.ai)	Meeting capture where enabled; meeting audio, video, transcripts, and related metadata, configured for no media retention by the provider.	United States	security.recall.ai
FoundryLabs, Inc. (d/b/a E2B)	Execution environments; documents and intermediate outputs in active or paused workflows.	United States	trust.e2b.dev
Cloudflare, Inc.	Object storage and delivery; documents and generated artifacts.	Eastern North America	cloudflare.com
Amazon Web Services, Inc.	Configured feed staging and related infrastructure.	United States (US East, Ohio)	aws.amazon.com
Inngest, Inc.	Workflow orchestration; event payloads and execution records.	United States	inngest.com
Plus Five Five, Inc. (d/b/a Resend)	Email delivery; recipient details, message content, and delivery records.	United States	resend.com
Plaid Inc.	Authorized account connections and financial information under applicable consents and provider terms. Helmsted does not store financial-institution passwords through this service.	United States	plaid.com
SideGuide Technologies, Inc. (d/b/a Firecrawl)	Public-web retrieval; submitted URLs and queries. Client information requires authorization for that processing.	United States	firecrawl.dev

Location column shows each provider's primary service location. ZDR: zero data retention arrangement.

Notes for reviewing firms

Listed primary service locations are not an exclusive processing or support residency guarantee. Processing remains subject to the governing DPA.

AI processing follows the required no-training and zero-retention arrangements. Helmsted's stored records, paused sandboxes and workflow histories have separate retention treatment.

This versioned list is Exhibit A of the DPA. An Order-date copy accompanies the executed Order; later changes follow the DPA. Contact security@helmsted.ai.

Version history

**1.5 · September 19,
2026**

Added Recall.ai (meeting capture) and TypeSafe AI, Inc. (AI processing). Vercel description now includes AI request routing. Change terms follow DPA v1.7.
